CALL FOR PAPERS

The ICIBDCT 2017 : 19th International Conference on Innovative Building Designs and Construction Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Innovative Building Designs and Construction Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

History of architecture and the built environment
Individual buildings and building types
Town planning
Architectural theory
Developments in construction
Construction management
Construction safety and Health

Architectural design and it's theory
Bridge engineering and building structure
Materials and construction systems
Building technology
Construction and control;

detection and transformation
Structural engineering and disaster reduction
Social research examines the people who inhabit and use the spaces of architecture
Technological research studies the physical materials, methods, elements, systems, and science of architecture and the design and construction processes
Environmental research investigates the physical context of architecture, opening timely questions about the influence of society on environment
