## CALL FOR PAPERS

The ICRETM 2018 : 20th International Conference on Railway Engineering and Transportation Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Railway Engineering and Transportation Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Railway engineering	technology of all railway sub-systems
Rail technology and engineering	Intelligent infrastructure and asset management strategies
Design, construction and operation of railway systems	Event recording and data logging
Command, control and railway signaling	Predictive analysis tools and techniques
Permanent way engineering	State-of-the-art sensing techniques and non-destructive testing
Railway vehicle engineering	Data management, standards, modelling and presentation
Railway systems engineering	Condition-based maintenance and reliability-centered maintenance
Railway signaling	System management and cost benefit analysis
Fare collection	
CCTV	
Public address	
Intrusion detection	
Access control	
Systems integration	
Condition monitoring
