CALL FOR PAPERS

The ICBSSE 2018 : 20th International Conference on Building Structure and Structural Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Building Structure and Structural Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Individual buildings and building types
History of architecture and the built environment
Architectural theory
Developments in construction
Town planning
Allied arts such as painting and sculpture
Social Research examines the people who inhabit and use the spaces of architecture
Technological Research studies the physical materials, methods, elements, systems, and science of architecture and the design and construction processes

Environmental Research investigates the physical context of architecture, opening timely questions about the influence of society on environment
Cultural Research studies place-making and the norms of the inhabitants of natural and built places past, present, and future
Organizational Research examines the ways in which individuals and teams collaborate in the practice of architecture and in the client organizations
Design Research considers the
