CALL FOR PAPERS

The ICSAE 2021 : 23rd International Conference on Structural and Acoustical Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structural and Acoustical Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Structural and acoustical engineering	structures
Architecture, structures and acoustic	Emerging technologies
Architecture and structural design	Glass structures
Architecture, urban planning and design	Innovative architectural and structural design
Building envelopes and facades	Landscape architecture and urban planning
Comprehension of complex forms	Lightweight and membrane structures
Computer and experimental methods	Special structures
Concept architectural buildings and futuristic structures	Steel and composite structures
Concrete and masonry	Structural design challenges
	Tall buildings
	The tectonic of architectural solutions
	The use of new materials
	Timber structures
