

# CALL FOR PAPERS

ICDPUM 2014 Apr 14-15, 2014, Venice, Italy

The ICDPUM 2014 : 16th International Conference on Resource Conservation and Restoration Ecology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Resource Conservation and Restoration Ecology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Examples and visions of “liveable cities for everyone”	Advanced analytical and planning tools and methods
Keeping balance: managing complex urban infrastructures	Mobility Pass for Residential Real Estate
Housing and real estate perspectives, high tech & low cost housing	Strategies for sustainable and liveable cities
Perspectives for future transport and mobility	Managing risks of modern society
Urban and environmental technologies to improve quality of life	The Energy Fund for Renewable Energies
Ambient Assisted Living (AAL) in the urban context	Mobility survey and data collection
Healthy cities, health in cities	Do rankings and performance indicators influence the Quality of Life of ordinary people?
Safety and security vs. lack of privacy and total surveillance	Innovative Planning Tools
Data, information and knowledge infrastructures for planning, management and decision support	Healthy Cities and Quality of Life
Understanding cities: tools and technologies to support decision makers, citizens and experts in their understanding of cities	Liveable and sustainable cities
Sustainable Urban Development	Actors and roles in shaping the urban future
Creating the Future: Urban Design, Temporal Structures, Visions, Fantasies	Challenges in Metropolitan Regions
Energy and Mobility as key factors for sustainability and Quality of Life	Mobility planning and the environment
(R)evolutionary reshaping urban structures	Public space - the basis for urban life
Managing human and natural resources	Urban Patterns/Urban Structures
Spatial Planning Data Harmonisation	Knowledge and innovation in Urban structures
Tools and technologies for strategic urban development	Infrastructure as the key for the functioning of cities and regions
Mobility for people with special needs?	Dynamics in contemporary urban fabric

**Background:** International Research Conference Series is an event that brings together a significant number of recurring events; academic conferences, symposia, workshops, special sessions, and plenary talks in all research fields since inception in 1999. Each event may run over any span of time within the conference days. Presentations scheduled in the Oral and ePoster sessions are drawn from a selection of the peer reviewed papers from a wide range of scientific and other disciplines of inquiry.
