

CALL FOR PAPERS

ICCMIP 2017
May 25-26, 2017
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCMIP 2017 : 19th International Conference on Computational Methods for Inverse Problems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Methods for Inverse Problems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computational Methods for
Algorithms and
Bayesian estimation
Kernel methods
Learning methods
Convex optimization
Free discontinuity

Metamodels
Proper orthogonal
Reduced models for the
Non-linear inverse
Image reconstruction and
Applications in
