

CALL FOR PAPERS

ICORES 2017
May 04-05, 2017
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICORES 2017 : International Conference on Oil Reserves and Energy Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Oil Reserves and Energy Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geopolitics of oil and natural gas	Energy efficiency challenges
Oil and gas transportation and pipelines	Energy and environmental policy
Oil reserves and production	Prospects for nuclear power
Technology adoption prospects and policies	Prospects of CCS technologies
Integration of intermittent power sources	Shale fuel reserves, economics and sustainability
Energy storage and network balancing	Low carbon heat and power (CCS, Nuclear, Wind, Solar, Hydro, etc.)
Vertical integration versus unbundling	Low carbon transport (Fuel Cells and Hydrogen)
Grid integration and infrastructure	Regulation and regulation uncertainties
Computing, data and energy system modelling	Risk management issues in the energy sector
Distributed generation issues	Security of supply issues
Policy, targets and resource efficiency	Distributed generation
Prospects for alternative transportation fuels	Carbon trading and taxation
Energy and sustainable development	Climate change and energy industry
