

# CALL FOR PAPERS

**ICSBB 2018**  
**Mar 15-16, 2018**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSBB 2018 : International Conference on Soil Biology and Biochemistry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Soil Biology and Biochemistry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Soil Biology and Biochemistry  
Novel molecular approaches  
Community dynamics and processes  
Modelling of soil biological and biochemical processes  
Mitigation and adaption to climate change  
Carbon storage and soil organic matter dynamics  
Effects of introduced genetically modified organisms

Application and outcomes of biotechnology on the soil environment and its biological functions  
Biological farming  
Role of soil biota in ecological engineering  
Microbial and plant signalling mechanisms  
Effects of invasive species  
Soil structure and biota interactions  
Relationships between the biota and soil physicochemical properties
