

CALL FOR PAPERS

ICDT 2019
May 14-15, 2019
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDT 2019 : International Conference on Data Transmission is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Data Transmission. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Data transmission	Asynchronous and synchronous data transmission
Digital transmission	Computer networking
Digital communications	Information theory
Protocol layers: physical layer, data link layer, and presentation layer	Signal processing
applications and history	Telecommunication
Serial and parallel transmission	Applications of data transmission
Types of communication channels	Copper wires, optical fibers, and wireless communication channels
Data transmission circuit, full-duplex, half-duplex, and multi-drop	Storage media and computer buses
Bus network, mesh network, ring network, star network, and wireless network	Electromagnetic signal, electrical voltage, and radiowave
Point-to-point and simplex	Microwave, and infrared signal
