

CALL FOR PAPERS

ICESEM 2019
Jul 22-23, 2019
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICESEM 2019 : International Conference on Energy Storage and Energy Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Energy Storage and Energy Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Power system and energy engineering
Biotechnology
Power system planning and scheduling
Power system protection, operation and control
Transmission and distribution system and apparatus
Advanced characterization techniques
All solid state batteries

Batteries for grid energy storage
Capacitive energy storage systems
Ceramic and metallic interconnects
Computational modeling of processes in SSHS
Electrolytes; oxygen ion, proton and mixed conductors
Fuel cell catalysts and catalyst support
