

CALL FOR PAPERS

ICCPMO 2019
Dec 04-05, 2019
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCPMO 2019 : International Conference on Construction Project Management and Optimization is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Construction Project Management and Optimization. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Construction project management
Construction project management and safety
Management and control functions for construction projects
Fundamentals of construction safety planning
Construction design and requirements
Construction project delivery process
Key management factors
Integrated cost and schedule control
Portfolio management
Linear and integer programming, and optimization

Problems in project management
Resource leveling
Time-cost trade-off problem
Resource-constrained project scheduling problem
Multi-project resource optimization
Report preparation
Team study and oral presentation
Factors affecting project success
Project scheduling and control
Optimization in project management
