

# CALL FOR PAPERS

**ICCSNDSP 2020**  
**Jan 30-31, 2020**  
**Dubai, UAE**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSNDSP 2020 : International Conference on Communication Systems, Networks and Digital Signal Processing is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Communication Systems, Networks and Digital Signal Processing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Communications Systems and Theory  
Modulation  
Coding theory and techniques  
Fading channels  
Chip design for communications  
Multiplexing  
Adaptive modelling  
Modelling and simulation techniques  
Filtering techniques  
Noise reduction  
Transmission diversity  
New techniques in RF-design and modelling  
Demodulation

Communications for disaster management  
Synchronization  
Teletraffic models and traffic engineering  
Queuing Theory  
Microwave Communications  
New techniques in RF-design and modelling  
Satellite & space communications  
Radio communications  
Speech technology  
Communications Protocols  
Internet protocols  
Transport control protocols
