

CALL FOR PAPERS

ICIADM 2020
Jan 20-21, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICIADM 2020 : International Conference on Information Architecture and Data Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Information Architecture and Data Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Information architecture
Common methodologies for designing information
Library science
Navigation and hierarchy creation
Wireframing
Labeling
Taxonomies and metadata
Data modeling
Organizing and labelling websites, intranets, online communities and software
Improving usability of information

Principles of design and architecture
Information models and concept
Complex information systems
Library systems and database development
Structural design of information environments
Data architecture
Data management
Data presentation architecture
Applications information architecture
Information science and engineering
