

# CALL FOR PAPERS

**ICLDAM 2020**  
**Jan 20-21, 2020**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICLDAM 2020 : International Conference on Logical Database Modeling is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Logical Database Modeling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Logical data model  
Logical schema  
Reasons for building a logical data structure  
Conceptual, logical and physical data model  
Database management  
Technology  
Data integration  
Understanding of business data elements and requirements  
Data redundancy  
Business transaction inconsistency  
Development and maintenance time and cost

Logical process model and impact analysis  
Foundation for designing a database  
Data modeling  
Data models  
Process of creating a data model for an information system  
Formal data modeling techniques  
Management systems  
Analysis  
Database design  
Information management
