

# CALL FOR PAPERS

**ICVEAR 2020**  
**Jan 09-10, 2020**  
**Singapore, SG**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICVEAR 2020 : International Conference on Veterinary Epidemiology and Antimicrobial Resistance is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Veterinary Epidemiology and Antimicrobial Resistance. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Animal science and veterinary medicine  
Veterinary diagnosis and treatment  
Disease surveillance, biosecurity and emergency preparedness  
Animal food safety  
Veterinary epidemiology  
Animal breeding and its advanced strategies  
Antimicrobial resistance  
Antimicrobial use issues in companion animals

Judicious use of animal health products  
International harmonization of new drug approval processes  
Veterinary medicine issues and applications  
Animal welfare and animal care  
Mass destruction of animals for disease control  
Establishment of codes of practice for responsible animal care  
Humane handling of livestock in animal production systems  
Alternative methods for animal testing
