

CALL FOR PAPERS

ICGESR 2020
Feb 06-07, 2020
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGESR 2020 : International Conference on Geotechnical Engineering and Sampling Requirements is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geotechnical Engineering and Sampling Requirements. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geotechnical engineering
Safety
Existing utility protection
Landowner notification
Work on railroad property
Traffic control
Work in environmentally protected lands
Minimum geotechnical investigation requirements
Subsurface exploration methods
Ground water observation wells
Sampling requirements
Soil, intermediate geomaterial, and rock descriptions

Boring logs
Laboratory testing
Soil laboratory testing
Rock testing
Geotechnical analyses
Geotechnical design for substructures
Soils for embankments and subgrades
Geotechnical design for embankments and cut slopes (soil)
Geotechnical design for rock slopes and rock cuts
Drainage pipes and culverts
Stormwater management basins
Project sampling, testing and inspection
