

CALL FOR PAPERS

ICSEA 2020
Feb 13-14, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSEA 2020 : International Conference on Structural Engineering and Architecture is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structural Engineering and Architecture. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Structural engineering
Building structures
Earthquake engineering structures
Civil engineering structures
Mechanical structures
Aerospace structures
Nanoscale structures
Structural engineering for medical science
Structural elements
Structural design
Building design
Structural pattern
Design and analysis

Stability, strength and rigidity of built structures
Building structure
Nonbuilding structure
Mechanical structures
Construction and structure
Structural failure
Base isolation system
Seismic performance
Functioning and safety of building structure
Research, planning and design of permanent and temporary structures
Construction, inspection and monitoring of permanent and temporary structures
Maintenance, rehabilitation and demolition of permanent and temporary structures
Technical, economic, environmental, aesthetic and social aspects of structures
