

# CALL FOR PAPERS

**ICSRSE 2020**  
**Mar 05-06, 2020**  
**Rome, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSRSE 2020 : International Conference on Sedimentary Rocks and Sedimentary Environments is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sedimentary Rocks and Sedimentary Environments. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

## Sedimentary rocks

Petrology of sedimentary rocks  
Rare earth elements in sedimentary rocks  
Density, porosity, and compaction of sedimentary rocks  
Evolution of sedimentary rocks  
Biochemical and organic sediments and sedimentary rocks  
Chemical sediments and sedimentary rocks  
Sedimentary structures  
Transgressions and regressions  
Classification based on origin  
Clastic sedimentary rocks  
Conglomerates and breccias  
Sandstones

## Mudrocks

Biochemical sedimentary rocks  
Chemical sedimentary rocks  
Compositional classification schemes  
Deposition and transformation  
Sediment transport and deposition  
Transformation (diagenesis)  
Color and texture  
Mineralogy  
Fossils  
Primary sedimentary structures  
Secondary sedimentary structures  
Sedimentary environments
