

CALL FOR PAPERS

ICCSOSP 2020
Apr 23-24, 2020
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSOSP 2020 : International Conference on Computer Systems, Organization and System Programming is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computer Systems, Organization and System Programming. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computer engineering
Electrical engineering and computer science
Computer organization
Components
Programming
Data structures
Microprogramming
Assembly language
Computer systems
Engineering applications
Operating systems and application systems
Memory, process and cpu management
Single contiguous memory management

Partition memory management
Paged memory management
Design and implementation
Ram and rom
Computer software
Computer architecture
Memory
Arithmetic/logic unit
Input/output units
Control unit
Simple logic gates
Review of gate processing
Constructing gates
