

# CALL FOR PAPERS

**ICSGTE 2020**  
**Apr 09-10, 2020**  
**Venice, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSGTE 2020 : International Conference on Structural Geology Tectonics and Environment is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structural Geology Tectonics and Environment. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Structural geology  
Measurement conventions  
Plane, fabric, fold and deformation  
conventions  
Stereographic projections  
Rock macrostructures  
Rock microstructures  
Kinematics  
Stress fields  
Computer simulations  
Geological processes, hazards and  
resources  
Tectonics  
Geodynamic model  
Collision tectonics

Deformational histories  
Plate tectonics  
Crustal deformation  
Compressional tectonics  
Environmental geologists and  
hydrogeologists  
Economic geology  
Petroleum geology  
Mining geology  
Measure methods  
Planar features and linear  
features  
Orthographic projections  
Vectors and tensors  
Vector products
