

CALL FOR PAPERS

ICCSP 2021
Jan 10-11, 2021
Singapore, SG

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSP 2021 : International Conference on Communications and Signal Processing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Communications and Signal Processing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Modulation and Coding
Channel Estimation and Equalization
Adaptive Antenna and MIMO Systems
OFDM and Multicarrier Systems
UWB Systems
Wireless Sensor Networks
Cognitive Radio
Relay Networks
Multimedia Communications
Emergent Wireless Technologies
Network and Radio Resource Management
Free Space Communications
Fiber Optic Systems

WDM Systems
Passive Optical Networks
NGN Optical Networks
Application and Services
Signal Processing Track
Audio and Speech Processing and Coding
Speech and Speaker Recognition
Adaptive and Statistical Signal Processing
Array Processing
Image and Video Processing
System Identification and Modeling
Time-Frequency and Time-Scale Analysis
Wavelets and Filter Banks
