

CALL FOR PAPERS

ICCEPR 2021
May 28-29, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCEPR 2021 : 23th International Conference on Civil Engineering Projects is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Civil Engineering Projects. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Civil engineering
Civil engineering works
Civil engineering
Planning in construction
Preparing daily, weekly
Working out resource
Project management tools
Reconciliation of major
Monitoring of
Micro planning
Civil engineering
Civil engineering
Infrastructure projects
Manufacturing processes
Civil engineering
Specialist practice

Practical application of
Transport systems and
Consultant of civil
Construction management
Environmental concerns
Creating and maintaining
Materials science and
Functional structures
Strengthening and
Structures that surround
Design, construction and
Materials science
Construction and
Water resources
Geography, geology,
