

# CALL FOR PAPERS

**ICCMIP 2017**  
**May 25-26, 2017**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCMIP 2017 : 19th International Conference on Computational Methods for Inverse Problems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Methods for Inverse Problems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computational Methods for  
Algorithms and  
Bayesian estimation  
Kernel methods  
Learning methods  
Convex optimization  
Free discontinuity

Metamodels  
Proper orthogonal  
Reduced models for the  
Non-linear inverse  
Image reconstruction and  
Applications in
