

CALL FOR PAPERS

ICCECM 2017
Dec 18-19, 2017
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

The ICCECM 2017 : 19th International Conference on Computational and Experimental Condensed Matter is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Resource Conservation and Restoration Ecology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Biopolymers and proteins
Bose Einstein
Colloids
Complex fluids
Computational complexity
Device physics
Ferromagnetic oxides,
Granular systems
High-temperature
Hysteresis in various
Mesoscopic properties of
Microfabrication
Molecular motors
Multiphase flow
Nanostructure technology
Network analysis
Novel superconductivity
Polymer physics
Porous materials

Porous media
Probes of cellular
quantum computing
quantum control of single
quantum magnetism in
quantum spin-textures
Spin polarized quantum
Spin-liquids
Superconductivity
Superfluidity
The dynamics of DNA
The fractional quantum
The physics of
The physics of
The physics of restricted
The study of critical
Thin film physics
Topological insulators
Topological phases
